

## F-Class MOA Reticle

F-Class competitors and other long-distance shooting enthusiasts will dominate targets with the high contrast, ultra-fine, and versatile F-Class MOA reticle. The only reticle of its kind to feature multiple illuminated center dots, the Front Focal Plane reticle keeps the 1/2 MOA grid design accurate at any magnification. A second 20 MOA offset 1/2 MOA grid allow shooters to obtain an extra 20 MOA of elevation beyond the capability of the turret adjustments and still have horizontal wind hold-off references. At each 10 MOA section you'll find an ultra-fine crosshair with 1/8 MOA illuminated dot for maximum versatility.

### Reticle Subtensions (in MOA)

Model	A	B	C	D	E	F	G	H
