

## Galco Belt Sizing Information

The best way to determine the correct size Galco belt to order

Measure your **existing** belt from the end of the buckle to the **hole you are currently using**. That measurement will be the size you should order your new Galco belt. Galco belts are made in even sizes only, so you should **round up** to the nearest even size. Galco belts are sized to the center hole.

Keep in mind: If you will be wearing a holster and/or magazine carrier inside the pants, you may need to add 2 more inches.
