

M2 SERIES

The DKX M2 Series ballistic plates are intended for use as an ultra-lightweight hard plate alternative to traditional level IIIA soft armor. This series also features an inherently handgun and knife resistant construction, offering true multi-threat capabilities unmatched by soft armor. Additionally, the M2 Series utilizes a multi-curve geometry, which provides greater comfort and fit to a wide variety of users. Available sizes range from 5"x6" to 11"x14", making this series an ideal choice for use as a trauma plate or side armor.
