

Ballistic CQ™ Reticle

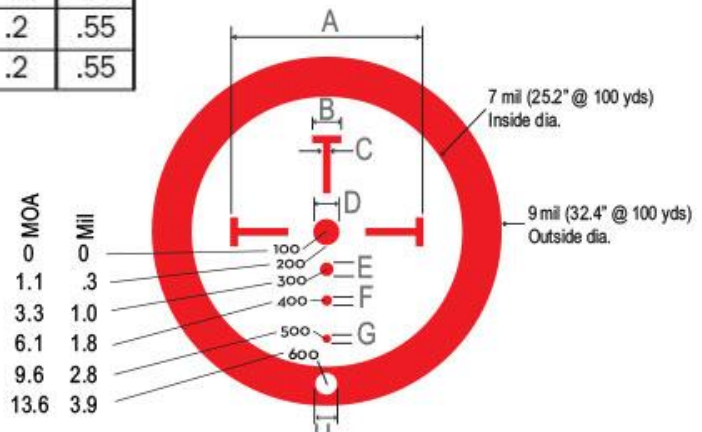

Ballistic CQ reticles were developed for competitive shooters, law enforcement, and military applications. They're fast and accurate, making them perfect for close-range tactical applications and the perfect configuration for the MTAC 1x-4x-24mm and 1.5x-6x-40mm models. The circular center provides ultra-fast engagement at close distances, while the smaller dots of the reticle provide trajectory compensation out to 600 yards for the popular 5.56 and 7.62 cartridges. Illumination reduces time for shooter to get on target in any lighting condition and dramatically increases accuracy when target is dark.

Reticle Subtensions (in Mils)

Model	A	B	C	D	E	F	G	H
AR-332	5	.75	.2	.66	.33	.25	.2	.55
AR-556	5	.75	.2	.66	.33	.25	.2	.55
1x-4x*	5	.75	.2	.66	.33	.25	.2	.55

*Calibrations for any power
