

PLANTING INSTRUCTIONS FOR IMPERIAL BOWSTAND

1. Eliminate grass in clearing by weed eating, mowing or spraying (If spraying, allow one week before seeding).

Note: plants require minimum of four hours of sunlight per day.

2. Rake area thoroughly to remove grass and debris.

3. Broadcast **BowStand™**.

4. Re-rake area lightly.

5. Seeds will germinate within one week (with rainfall).

Note: For best results add 40 lbs. of 10-10-10 fertilizer (or equivalent) and 50 to 100 lbs. of ag lime before seeding.
