

Gold Tip Arrow Chart

Step 1: Find your draw weight in the chart.

Step 2: Determine the length of your arrow by measuring from the throat of the nock to the end of the insert.

Step 3: Find the correct group number in the shaft selection chart.

Step 4: Select your desired shaft from those that correspond with your group number in the listing found below the shaft selection chart.

Note: Arrow length is measured from the throat of the nock to the end of the insert. If you are shooting a longer broadhead than field point, you may want to choose a slightly stiffer shaft.

		Length of Arrow																			
		Compound Bow										Traditional Bow									
Draw Weight		23"	24"	25"	26"	27"	28"	29"	30"	31"	32"	23"	24"	25"	26"	27"	28"	29"	30"	31"	32"
